

CSS Border Images Guide

Complete Reference with Interactive Examples

1. border-image Property

The border-image property allows you to use images, gradients, or patterns as borders instead of solid colors. It's a shorthand for multiple border-image properties.

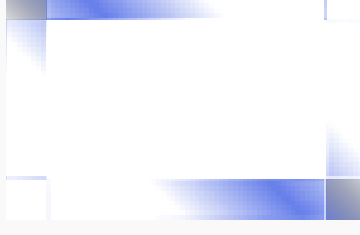

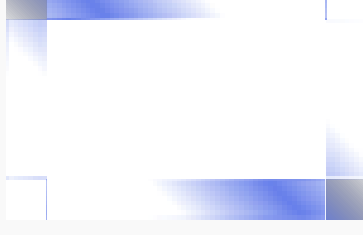

```
/* Basic syntax */ border-image: ; /* Simple gradient border */ border: 15px solid; border-image: linear-gradient(45deg, #667eea, #764ba2) 1; /* With stretch (default) */ border-image: linear-gradient(90deg, red, blue) 1 stretch; /* With repeat */ border-image: linear-gradient(45deg, red, blue) 20 repeat;
```

2. border-image-slice

Specifies how to slice the border image. Defines the offset inward from each edge of the source image.

```
/* Single value - applies to all sides */ border-image-slice: 20; /* Two values - vertical, horizontal */ border-image-slice: 20 30; /* Four values - top, right, bottom, left */ border-image-slice: 20 30 40 50; /* Fill keyword - fills the center area */ border-image-slice: 20 fill;
```

3. border-image-repeat

Specifies how the border image is repeated or scaled. Options: stretch (default), repeat, round, or space.

```
/* Stretch - default, stretches image to fit */ border-image-repeat: stretch; /* Repeat - tiles the border image */ border-image-repeat: repeat; /* Round - tiles and scales to fit exactly */ border-image-repeat: round; /* Space - tiles and adds space between tiles */ border-image-repeat: space;
```

4. border-image-width

Specifies the width of the border image. Can use different units: pixels, percentages, or the em unit.

```
/* Pixel value */ border-image-width: 15px; /* Multiple values - top, right, bottom, left */ border-image-width: 10px 20px 10px 20px; /* Em units - relative to font size */ border-image-width: 1em; /* Auto - uses border-image-slice value */ border-image-width: auto;
```

5. border-image-outset

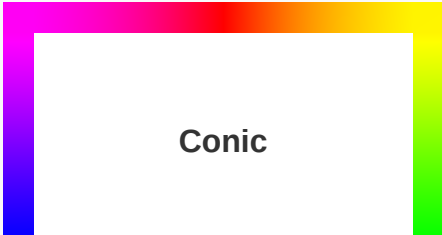

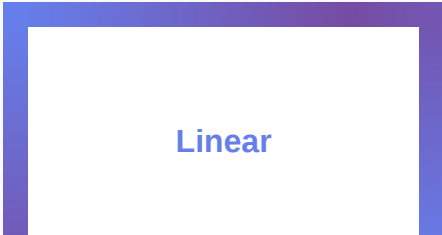

Specifies how far the border image extends beyond the border box. Creates space between content and border.

```
/* Single value */ border-image-outset: 10px; /* Two values */ border-image-outset: 10px 20px; /* Four values - top, right, bottom, left */ border-image-outset: 10px 20px 10px 20px; /* Em units */ border-image-outset: 1em;
```

6. border-image-source

Specifies the source for the border image. Can be a URL, gradient, or none.

```
/* Gradient source */ border-image-source: linear-gradient(45deg, #667eea, #764ba2); /* Radial gradient */ border-image-source: radial-gradient(circle, blue, transparent); /* Conic gradient */ border-image-source: conic-gradient(red, yellow, lime, cyan, blue); /* URL to image */ border-image-source: url('border-pattern.png'); /* None - no border image */ border-image-source: none;
```

7. Gradient Types for Borders

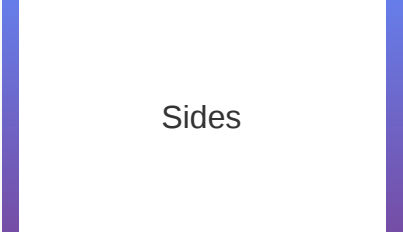

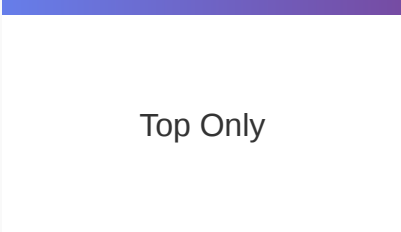

Different gradient types create unique border effects. Each gradient type produces different visual results.

```
/* Linear gradient - direction specified */ border-image-source: linear-gradient(90deg, red, blue); /* Radial gradient - circles from center */ border-image-source: radial-gradient(circle, red, blue); /* Conic gradient - rotates around center */ border-image-source: conic-gradient(red, yellow, lime); /* Repeating gradients */ border-image-source: repeating-linear-gradient(45deg, red 0px, red 10px, blue 10px, blue 20px);
```

8. Individual Border Sides

Apply border-image to specific sides: border-top, border-right, border-bottom, border-left.

```
/* Apply to top border only */ border-top: 8px solid; border-image-source: linear-gradient(90deg, #667eea, #764ba2); border-image-slice: 1; /* Apply to left and right borders */ border-left: 8px solid; border-right: 8px solid; border-image-source: linear-gradient(180deg, #667eea, #764ba2); border-image-slice: 1;
```

9. Traditional Border Styles

While border-image is powerful, traditional border styles still have their place for simple effects.

```
/* Solid border */ border: 10px solid #667eea; /* Dotted border */ border: 10px dotted #667eea; /* Dashed border */ border: 10px dashed #667eea; /* Double border */ border: 10px double #667eea; /* Groove, ridge, inset, outset */ border: 10px groove #667eea;
```

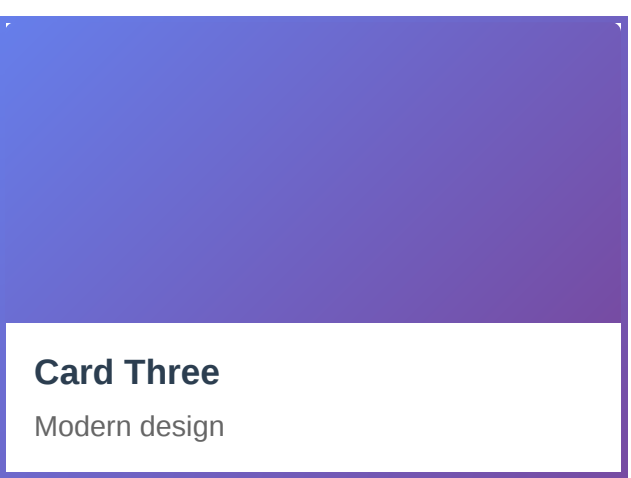

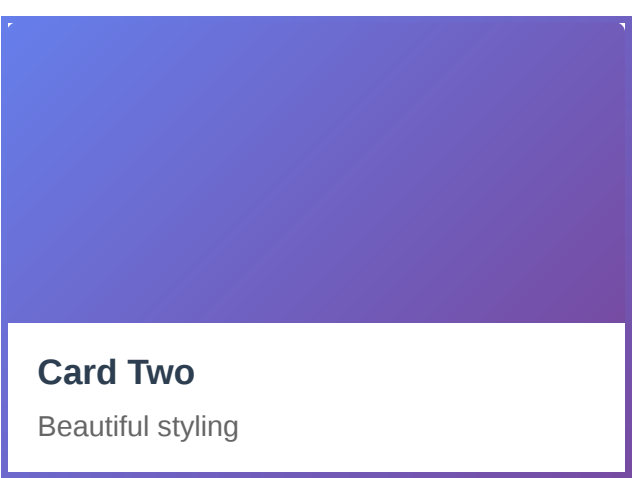

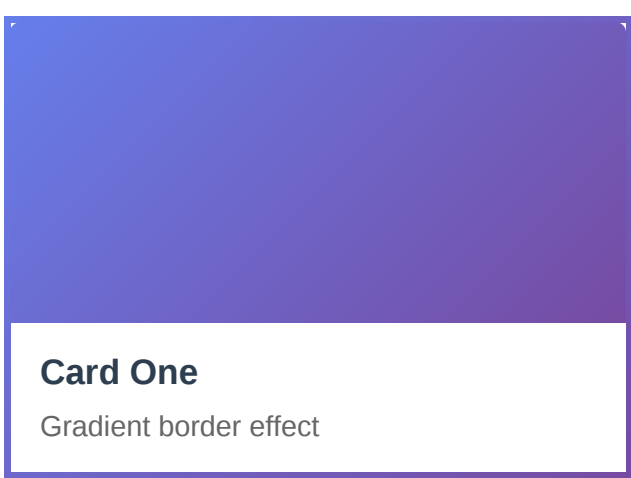

Real-World Projects

Project 1: Card Collection with Gradient Borders

Modern cards with gradient border images and hover effects.

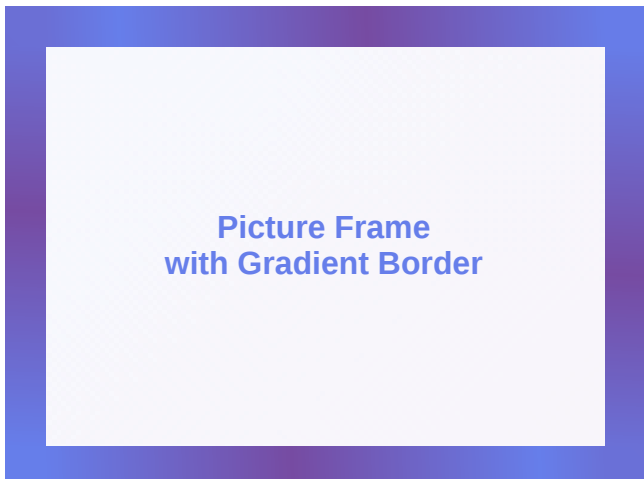

```
.card-item { border: 3px solid; border-image: linear-gradient(135deg, #667eea, #764ba2) 1; border-radius: 8px; overflow: hidden; background: white; transition: all 0.3s ease; } .card-item:hover { transform: translateY(-5px); box-shadow: 0 8px 20px rgba(102, 126, 234, 0.2); }
```

Project 2: Picture Frame Border

Create an elegant frame effect using gradient border images.

```
.frame-box { border: 20px solid; border-image: linear-gradient( 45deg, #667eea 0%, #764ba2 25%, #667eea 50%, #764ba2 75%, #667eea 100% ) 1; background: rgba(102, 126, 234, 0.05); }
```

Project 3: Image Gallery with Conic Borders

Gallery with colorful conic gradient borders.

```
.gallery-item { border: 3px solid; border-image: conic-gradient(from 45deg, #667eea, #764ba2, #667eea) 1; cursor: pointer; transition: transform 0.3s ease; } .gallery-item:hover { transform: scale(1.05); }
```
