| 11.5      | Exercise 5: Multi-Type Form . . . . .                                          | 26        |
| 11.6      | Exercise 6: Contenteditable Editor . . . . .                                   | 26        |

# Chapter 1

## Introduction to Caret-Color

### 1.1 What is Caret-Color?

The `caret-color` property in CSS allows you to customize the color of the text cursor (caret) that appears in input fields, textareas, and other editable elements. The caret is the blinking line that indicates where text will be inserted when you type.

*Think of it as: "Change the color of the blinking cursor in input fields."*

[colback=lightblue, colframe=codeblue, coltitle=darkblue, title=Key Concept] The `caret-color` property enhances user experience by making the text cursor match your brand colors or improve visibility based on the input field's background.

### 1.2 Basic Syntax

```
input {
  caret-color: blue;
}

textarea {
  caret-color: #ff0000;
}

div[contenteditable] {
  caret-color: rgb(0, 255, 0);
}
```

### 1.3 Why Use Caret-Color?

- Improve form design consistency
- Enhance brand recognition with brand colors
- Better visibility on dark backgrounds
- Create visual feedback for focus state

- Match cursor color to input styling
- Improve accessibility and user experience
- Make forms more visually appealing

### 1.4 Browser Support

`caret-color` has good browser support in modern browsers (Chrome 57+, Firefox 53+, Safari 11.1+, Edge 79+). It's widely available across all contemporary platforms.

## Chapter 2

# Basic Usage

### 2.1 1. Named Colors

Use predefined color names:

[colback=codegray, colframe=darkblue, title=CSS Code]

```
input {
    caret-color: blue;
}

textarea {
    caret-color: red;
}

input[type="email"] {
    caret-color: green;
}

input[type="password"] {
    caret-color: purple;
}
```

### 2.2 2. Hex Color Codes

Use hexadecimal color codes:

[colback=codegray, colframe=darkblue, title=CSS Code]

```
input {
    caret-color: #007bff;
}

textarea {
    caret-color: #dc3545;
}

input:focus {
    caret-color: #28a745;
}
```

### 2.3 3. RGB and RGBA

Use RGB or RGBA values:

[colback=codegray, colframe=darkblue, title=CSS Code]

```
input {
    caret-color: rgb(0, 123, 255);
}

textarea {
    caret-color: rgba(220, 53, 69, 0.8);
}

/* Semi-transparent caret */
input {
    caret-color: rgba(0, 0, 255, 0.5);
}
```

### 2.4 4. HSL Colors

Use HSL color format:

[colback=codegray, colframe=darkblue, title=CSS Code]

```
input {
    caret-color: hsl(217, 100%, 50%);
}

textarea {
    caret-color: hsl(0, 100%, 50%);
}

/* With transparency */
input {
    caret-color: hsla(217, 100%, 50%, 0.7);
}
```

### 2.5 5. The auto Value

Reset to browser default:

[colback=codegray, colframe=darkblue, title=CSS Code]

```
input {
    caret-color: auto;
}

/* Same as currentColor (uses element's color) */
textarea {
    caret-color: currentColor;
}
```

## Chapter 3

# Practical Examples

### 3.1 Example 1: Brand-Colored Form

Create a form with brand-colored cursors:

[colback=codegray, colframe=darkblue, title=HTML]

```
<form>
  <input type="text" placeholder="Name">
  <input type="email" placeholder="Email">
  <textarea placeholder="Message"></textarea>
  <button>Submit</button>
</form>
```

[colback=codegray, colframe=darkblue, title=CSS]

```
/* Brand color: #0066cc (blue) */
input, textarea {
  padding: 12px;
  border: 2px solid #ddd;
  border-radius: 4px;
  font-size: 16px;
  caret-color: #0066cc;
}

input:focus, textarea:focus {
  outline: none;
  border-color: #0066cc;
  box-shadow: 0 0 5px rgba(0, 102, 204, 0.3);
  caret-color: #0066cc;
}
```

### 3.2 Example 2: Dark Theme Input

Improve cursor visibility on dark backgrounds:

[colback=codegray, colframe=darkblue, title=HTML]

```
<input type="text" placeholder="Enter text"
      class="dark-theme">
```

[colback=codegray, colframe=darkblue, title=CSS]

```
.dark-theme {
  background-color: #2b2b2b;
  color: #ffffff;
  border: 1px solid #444;
  padding: 10px;
  border-radius: 4px;
  /* Light caret for visibility on dark background */
  caret-color: #00ff00;
}

.dark-theme:focus {
  outline: none;
  border-color: #00ff00;
  caret-color: #00ff00;
}
```

### 3.3 Example 3: Color-Coded Input Fields

Different cursor colors for different input types:

[colback=codegray, colframe=darkblue, title=HTML]

```
<form class="color-coded">
  <input type="text" placeholder="Name">
  <input type="email" placeholder="Email">
  <input type="password" placeholder="Password">
  <input type="tel" placeholder="Phone">
  <input type="url" placeholder="Website">
</form>
```

[colback=codegray, colframe=darkblue, title=CSS]

```
.color-coded input[type="text"] {
  caret-color: #0066cc;
}

.color-coded input[type="email"] {
  caret-color: #00cc66;
}

.color-coded input[type="password"] {
  caret-color: #cc0000;
}

.color-coded input[type="tel"] {
  caret-color: #cc6600;
}

.color-coded input[type="url"] {
  caret-color: #6600cc;
}

.color-coded input {
  display: block;
  margin: 10px 0;
  padding: 10px;
  border: 1px solid #ddd;
}
```

### 3.4 Example 4: Animated Cursor Effect

Create a custom cursor animation:

[colback=codegray, colframe=darkblue, title=HTML]

```
<input type="text" placeholder="Type here" class="animated">
```

[colback=codegray, colframe=darkblue, title=CSS]

```
@keyframes caretColor {
  0% { color: #ff0000; }
  50% { color: #00ff00; }
  100% { color: #0000ff; }
}

.animated {
  padding: 10px;
  border: 2px solid #ddd;
}

.animated:focus {
  outline: none;
  border-color: #0066cc;
  animation: caretColor 2s infinite;
}

.animated {
  caret-color: #0066cc;
}
```

### 3.5 Example 5: Accessibility-Focused Design

High-contrast cursor for better visibility:

[colback=codegray, colframe=darkblue, title=HTML]

```
<input type="text" placeholder="High contrast cursor">
<textarea placeholder="Larger text area"></textarea>
```

[colback=codegray, colframe=darkblue, title=CSS]

```
/* Accessibility mode: High contrast */
@media (prefers-contrast: more) {
  input, textarea {
    /* Bright white caret on any background */
    caret-color: #ffffff;
    border: 3px solid #000;
    background-color: #000;
    color: #ffffff;
  }
}

/* Default: Good contrast */
input, textarea {
  caret-color: #0066cc;
  border: 2px solid #0066cc;
  padding: 10px;
}
```

## Chapter 4

# Advanced Techniques

### 4.1 1. Responsive Caret Colors

Change caret color based on screen size:

[colback=codegray, colframe=darkblue, title=CSS]

```
input, textarea {
    caret-color: #0066cc;
}

/* Mobile: Larger, more visible cursor */
@media (max-width: 600px) {
    input, textarea {
        caret-color: #ff0000;
        font-size: 16px;
    }
}

/* Tablet: Medium sized cursor */
@media (max-width: 1024px) {
    input, textarea {
        caret-color: #00cc00;
    }
}

/* Desktop: Standard cursor */
@media (min-width: 1025px) {
    input, textarea {
        caret-color: #0066cc;
    }
}
```

### 4.2 2. Dark Mode Support

Automatic cursor color for dark mode:

[colback=codegray, colframe=darkblue, title=CSS]

```
/* Light mode */
input, textarea {
```

```
background-color: #ffffff;
color: #000000;
caret-color: #0066cc;
}

/* Dark mode */
@media (prefers-color-scheme: dark) {
  input, textarea {
    background-color: #1a1a1a;
    color: #ffffff;
    caret-color: #ffff00;
  }
}
```

### 4.3 3. Focus State Transitions

Smooth cursor color transitions:

[colback=codegray, colframe=darkblue, title=CSS]

```
input, textarea {
  caret-color: #cccccc;
  transition: caret-color 0.3s ease;
  border: 2px solid #ddd;
  transition: border-color 0.3s ease;
}

input:focus, textarea:focus {
  caret-color: #0066cc;
  border-color: #0066cc;
  outline: none;
}

input:hover, textarea:hover {
  caret-color: #666666;
}
```

### 4.4 4. Contenteditable Elements

Style cursor in editable divs:

[colback=codegray, colframe=darkblue, title=HTML]

```
<div class="editor" contenteditable="true">
  Click here to edit...
</div>
```

[colback=codegray, colframe=darkblue, title=CSS]

```
.editor {
  border: 2px solid #ddd;
  padding: 15px;
  min-height: 100px;
  border-radius: 4px;
}
```

```
    caret-color: #0066cc;
}

.editor:focus {
    outline: none;
    border-color: #0066cc;
    box-shadow: 0 0 10px rgba(0, 102, 204, 0.2);
}
```

## Chapter 5

# Real-World Projects

### 5.1 Project 1: Search Bar with Branded Cursor

[colback=codegray, colframe=darkblue, title=HTML]

```
<div class="search-bar">
  <input type="search" placeholder="Search...">
  <button>Search</button>
</div>
```

[colback=codegray, colframe=darkblue, title=CSS]

```
.search-bar {
  display: flex;
  gap: 10px;
  margin: 20px;
}

.search-bar input {
  flex: 1;
  padding: 12px 16px;
  border: 2px solid #0066cc;
  border-radius: 4px 0 0 4px;
  font-size: 16px;
  caret-color: #0066cc;
}

.search-bar input:focus {
  outline: none;
  box-shadow: 0 0 8px rgba(0, 102, 204, 0.3);
}

.search-bar button {
  padding: 12px 24px;
  background-color: #0066cc;
  color: white;
  border: none;
  border-radius: 0 4px 4px 0;
  cursor: pointer;
}
```

## 5.2 Project 2: Login Form with Custom Styling

[colback=codegray, colframe=darkblue, title=HTML]

```
<form class="login-form">
  <h2>Login</h2>
  <div class="form-group">
    <label>Username</label>
    <input type="text" placeholder="Enter username">
  </div>
  <div class="form-group">
    <label>Password</label>
    <input type="password" placeholder="Enter password">
  </div>
  <button>Login</button>
</form>
```

[colback=codegray, colframe=darkblue, title=CSS]

```
.login-form {
  max-width: 400px;
  margin: 40px auto;
  padding: 30px;
  border: 1px solid #ddd;
  border-radius: 8px;
  box-shadow: 0 2px 10px rgba(0, 0, 0, 0.1);
}

.form-group {
  margin-bottom: 20px;
}

.form-group label {
  display: block;
  margin-bottom: 8px;
  font-weight: bold;
  color: #333;
}

.login-form input {
  width: 100%;
  padding: 12px;
  border: 2px solid #ddd;
  border-radius: 4px;
  font-size: 16px;
  caret-color: #007bff;
  box-sizing: border-box;
}

.login-form input:focus {
  outline: none;
  border-color: #007bff;
  box-shadow: 0 0 8px rgba(0, 123, 255, 0.3);
}
```

```
.login-form button {  
  width: 100%;  
  padding: 12px;  
  background-color: #007bff;  
  color: white;  
  border: none;  
  border-radius: 4px;  
  font-size: 16px;  
  cursor: pointer;  
  margin-top: 20px;  
}
```

## 5.3 Project 3: Rich Text Editor

[colback=codegray, colframe=darkblue, title=HTML]

```
<div class="editor-container">
  <div class="toolbar">
    <button>Bold</button>
    <button>Italic</button>
    <button>Underline</button>
  </div>
  <div class="editor" contenteditable="true">
    Start typing here...
  </div>
</div>
```

[colback=codegray, colframe=darkblue, title=CSS]

```
.editor-container {
  max-width: 600px;
  margin: 20px auto;
  border: 1px solid #ddd;
  border-radius: 4px;
  overflow: hidden;
}

.toolbar {
  background-color: #f5f5f5;
  padding: 10px;
  border-bottom: 1px solid #ddd;
  display: flex;
  gap: 5px;
}

.toolbar button {
  padding: 8px 12px;
  background-color: white;
  border: 1px solid #ddd;
  border-radius: 3px;
  cursor: pointer;
}

.editor {
  min-height: 300px;
  padding: 20px;
  caret-color: #0066cc;
  font-family: 'Segoe UI', Tahoma, Geneva, Verdana;
}

.editor:focus {
  outline: none;
}
```

## Chapter 6

# Browser Compatibility

### 6.1 Desktop Browsers

| Browser | Version | Support |
|---------|---------|---------|
| Chrome  | 57+     | Full    |
| Firefox | 53+     | Full    |
| Safari  | 11.1+   | Full    |
| Edge    | 79+     | Full    |
| Opera   | 44+     | Full    |

### 6.2 Mobile Browsers

| Browser          | Version | Support |
|------------------|---------|---------|
| Chrome Mobile    | 57+     | Full    |
| Firefox Mobile   | 53+     | Full    |
| Safari iOS       | 11.3+   | Full    |
| Samsung Internet | 5+      | Full    |

### 6.3 Fallback for Older Browsers

For browsers that don't support `caret-color`, use a fallback approach:

```
input {  
  /* Fallback: make the input visually distinctive */  
  border: 2px solid #0066cc;  
  outline-color: #0066cc;  
  
  /* Modern browsers: color the cursor */  
  caret-color: #0066cc;  
}
```

## Chapter 7

# Tips and Best Practices

### 7.1 Tip 1: Match Border and Caret Color

Create visual consistency:

```
input {
  border: 2px solid #0066cc;
  caret-color: #0066cc;
}

input:focus {
  border-color: #0066cc;
  caret-color: #0066cc;
}
```

### 7.2 Tip 2: Ensure Sufficient Contrast

Make the cursor visible against backgrounds:

```
/* On light background */
input {
  background-color: #ffffff;
  caret-color: #0066cc;
}

/* On dark background */
.dark input {
  background-color: #2b2b2b;
  caret-color: #ffff00;
}
```

### 7.3 Tip 3: Use `currentColor` for Simplicity

Let the cursor inherit text color:

```
input {
  color: #0066cc;
  caret-color: currentColor;
}
```

```
}
```

### 7.4 Tip 4: Provide Visual Feedback

Enhance user experience with cursor changes:

```
input {  
    caret-color: #cccccc;  
}  
  
input:focus {  
    caret-color: #0066cc;  
}  
  
input:disabled {  
    caret-color: #999999;  
}
```

### 7.5 Tip 5: Test Accessibility

Ensure cursor is visible for all users:

```
/* Test with high contrast mode */  
@media (prefers-contrast: more) {  
    input {  
        caret-color: #000000;  
    }  
}  
  
/* Test with dark mode */  
@media (prefers-color-scheme: dark) {  
    input {  
        caret-color: #ffffff;  
    }  
}
```

## Chapter 8

# Common Mistakes to Avoid

### 8.1 Mistake 1: Invisible Caret on Dark Background

```
/* WRONG - Dark cursor on dark background */
.dark-input {
  background-color: #1a1a1a;
  color: #ffffff;
  caret-color: #1a1a1a;
}

/* RIGHT - Light cursor for visibility */
.dark-input {
  background-color: #1a1a1a;
  color: #ffffff;
  caret-color: #ffff00;
}
```

### 8.2 Mistake 2: Poor Color Contrast

```
/* WRONG - Low contrast */
input {
  background-color: #f0f0f0;
  caret-color: #e8e8e8;
}

/* RIGHT - High contrast */
input {
  background-color: #f0f0f0;
  caret-color: #0066cc;
}
```

### 8.3 Mistake 3: Using Only caret-color without Focus Styling

```
/* INCOMPLETE - Only cursor changes */
input {
```

```
    caret-color: #0066cc;
}

/* COMPLETE - Full focus feedback */
input {
    caret-color: #0066cc;
    border: 2px solid #ddd;
}

input:focus {
    outline: none;
    border-color: #0066cc;
    box-shadow: 0 0 5px rgba(0, 102, 204, 0.3);
}
```

### 8.4 Mistake 4: Ignoring Different Input Types

```
/* WRONG - Same color for all types */
input {
    caret-color: #0066cc;
}

/* BETTER - Specific colors per type */
input[type="text"] { caret-color: #0066cc; }
input[type="email"] { caret-color: #00cc66; }
input[type="password"] { caret-color: #cc0000; }
```

### 8.5 Mistake 5: Forgetting Disabled State

```
/* INCOMPLETE */
input:focus {
    caret-color: #0066cc;
}

/* COMPLETE - Include disabled state */
input:focus {
    caret-color: #0066cc;
}

input:disabled {
    caret-color: #999999;
    opacity: 0.6;
}
```

## Chapter 9

# Limitations and Considerations

### 9.1 Limitation 1: No Animation Support

**Issue:** `caret-color` cannot be animated directly with keyframes.

**Solution:** Use focus state changes:

```
input:focus {  
  caret-color: #0066cc;  
  transition: caret-color 0.3s ease;  
}
```

### 9.2 Limitation 2: Read-Only Inputs

**Issue:** `caret-color` doesn't apply to non-editable inputs.

**Solution:** Use on contenteditable elements:

```
input[type="text"] {  
  caret-color: #0066cc;  
}  
  
div[contenteditable] {  
  caret-color: #0066cc;  
}
```

### 9.3 Limitation 3: Mobile Considerations

**Issue:** Mobile keyboards may affect cursor visibility.

**Solution:** Use high contrast colors:

```
@media (max-width: 600px) {  
  input {  
    caret-color: #ff0000;  
    font-size: 16px;  
  }  
}
```

# Chapter 10

## Summary

[colback=lightblue, colframe=darkblue, title=What You Learned]

### **Key Points About Caret-Color:**

1. Controls the color of text cursor in input fields
2. Accepts color values (named, hex, rgb, hsl, rgba, hsla)
3. Works with input, textarea, and contenteditable elements
4. Improves form design and brand consistency
5. Enhances user experience and accessibility
6. Widely supported in modern browsers
7. Can be combined with focus states
8. Responds to media queries (dark mode, etc.)

Best practices:

- Match cursor color to form design
- Ensure sufficient color contrast
- Use for both regular and focus states
- Test on different backgrounds
- Support dark mode preferences
- Provide accessibility considerations
- Use `currentColor` for simplicity
- Combine with other focus feedback

**Master caret-color to create polished, professional forms with improved user experience!**

# Chapter 11

## Practice Exercises

### 11.1 Exercise 1: Brand-Colored Form

Create a contact form where:

- Input cursors match your brand color
- Focus states provide clear feedback
- Different colors for different field types

### 11.2 Exercise 2: Dark Mode Support

Build a form that:

- Changes cursor color in dark mode
- Maintains good contrast
- Responds to prefers-color-scheme

### 11.3 Exercise 3: Accessibility-Focused Design

Create inputs with:

- High contrast cursors
- Clear focus indicators
- Support for contrast preferences

### 11.4 Exercise 4: Search Interface

Design a search bar with:

- Brand-colored cursor
- Visual focus feedback
- Responsive design

### 11.5 Exercise 5: Multi-Type Form

Build a form with different cursor colors for:

- Text inputs
- Email inputs
- Password inputs
- URL inputs

### 11.6 Exercise 6: Contenteditable Editor

Create a text editor with:

- Custom cursor color
- Focus states
- Toolbar styling

*Complete these exercises to master the caret-color property!*
