Chapter 1

Introduction to `currentColor`

1.1 What is `currentColor`?

The `currentColor` keyword in CSS represents the computed value of the `color` property of an element. It allows you to use the text color of an element for other CSS properties like borders, backgrounds, box-shadows, and more.

Key facts about `currentColor`:

- Represents the element's `color` property value
- Works with any CSS property that accepts color values
- Inherits color from parent elements
- Automatically updates when color changes
- Reduces code duplication and maintenance
- Part of CSS Color Module Level 3
- Universal browser support (IE 9+)
- Enables dynamic color inheritance

1.2 Why Use `currentColor`?

Before `currentColor`, styling related properties to match text color required:

- **Less code repetition:** One color value affects multiple properties
- **Dynamic inheritance:** Color changes automatically cascade
- **Easier maintenance:** Update color once, affects all properties
- **Responsive consistency:** Color changes in media queries apply everywhere
- **Component reusability:** Create flexible color-aware components
- **Reduced bugs:** No mismatches between text and decoration colors
- **Cleaner CSS:** Less repetition of color hex values

1.3 Browser Compatibility

`currentColor` has excellent browser support:

- Chrome 1+ (all versions)
- Firefox 1.5+ (2005)
- Safari 4+ (2009)
- Edge (all versions)
- Internet Explorer 9+
- Opera 10.5+
- Mobile browsers (all modern)

Chapter 2

Basic Syntax and Usage

2.1 Simple currentColor Syntax

```
/* Using currentColor keyword */
.element {
    color: #0066cc;
    border: 1px solid currentColor; /* Uses #0066cc */
}

/* Using with different properties */
.element {
    color: #ff6b6b;
    border: 2px solid currentColor; /* Matches text color */
    box-shadow: 0 2px 4px currentColor; /* Uses current color */
    text-decoration-color: currentColor; /* Matches text color */
}

/* With RGB colors */
.element {
    color: rgb(100, 150, 200);
    background: currentColor; /* Uses RGB value */
}

/* With HSL colors */
.element {
    color: hsl(200, 50%, 50%);
    border-color: currentColor; /* Uses HSL value */
}
```

2.2 Common Use Cases

Property	Description
<code>border-color</code>	Match text color with borders
<code>background-color</code>	Use text color as background
<code>box-shadow</code>	Shadows using text color
<code>outline-color</code>	Focus states matching text
<code>text-decoration-color</code>	Underlines matching text
<code>fill</code>	SVG fill color
<code>stroke</code>	SVG stroke color

2.3 Inheritance Behavior

```
/* Parent sets color, children inherit via currentColor */
.parent {
  color: #0066cc;
}

.parent .child {
  border: 1px solid currentColor; /* Inherits #0066cc */
}

/* currentColor follows color cascading rules */
.parent {
  color: blue;
}

.parent .child {
  color: red; /* Overrides parent */
}

.parent .child .grandchild {
  border: 1px solid currentColor; /* Uses red, not blue */
}
```

Chapter 3

Practical Link Styling

3.1 Icon and Text Color Matching

```
<style>
  /* Link with icon - both use same color */
  a {
    color: #0066cc;
    text-decoration: none;
    display: inline-flex;
    align-items: center;
    gap: 0.5rem;
  }

  a svg {
    width: 1em;
    height: 1em;
    fill: currentColor; /* Icon color matches text */
    transition: all 0.3s ease;
  }

  a:hover {
    color: #0052a3;
  }

  a:hover svg {
    fill: currentColor; /* Automatically matches new color */
  }
</style>

<a href="#">
  <svg viewBox="0 0 24 24" width="20" height="20">
    <path d="M12 2C6.48 2 2 6.48 2 12s4.48 10 10 10 10-4.48
      10-10S17.52 2 12 2z"/>
  </svg>
  Click me
</a>
```

3.2 Colored Underlines with `currentColor`

```
<style>
/* Text with matching underline */
.underlined {
  color: #0066cc;
  text-decoration: underline;
  text-decoration-color: currentColor;
  text-underline-offset: 3px;
  text-decoration-thickness: 2px;
}

.underlined:hover {
  color: #0052a3;
  /* Underline automatically updates */
}

/* Different color variants */
.error {
  color: #ff0000;
  text-decoration: underline;
  text-decoration-color: currentColor;
}

.warning {
  color: #ffc107;
  text-decoration: underline;
  text-decoration-color: currentColor;
}

.success {
  color: #28a745;
  text-decoration: underline;
  text-decoration-color: currentColor;
}
</style>

<p>
  <span class="underlined">Blue underlined text</span>
  <span class="error">Red error message</span>
  <span class="warning">Yellow warning</span>
  <span class="success">Green success message</span>
</p>
```

3.3 Bordered Buttons with `currentColor`

```
<style>
/* Button with border matching text */
.button {
  display: inline-block;
  padding: 0.75rem 1.5rem;
  border: 2px solid currentColor;
}
```

```
    border-radius: 4px;
    background: transparent;
    color: #0066cc;
    font-weight: 600;
    cursor: pointer;
    transition: all 0.3s ease;
}

.button:hover {
    color: #fff;
    background: #0066cc;
    /* Border automatically updates */
}

/* Color variants */
.button.primary {
    color: #0066cc;
}

.button.success {
    color: #28a745;
}

.button.danger {
    color: #ff0000;
}

.button:hover.primary {
    background: #0066cc;
}

.button:hover.success {
    background: #28a745;
}

.button:hover.danger {
    background: #ff0000;
}
</style>

<button class="button primary">Primary Button</button>
<button class="button success">Success Button</button>
<button class="button danger">Danger Button</button>
```

Chapter 4

Advanced currentColor Techniques

4.1 Box Shadows with currentColor

```
/* Shadow using text color */
.shadow-text {
    color: #0066cc;
    box-shadow: 3px 3px 0 currentColor;
}

/* Layered shadows */
.layered-shadow {
    color: #667eea;
    box-shadow:
        0 2px 4px rgba(0, 0, 0, 0.1),
        0 4px 8px currentColor,
        0 8px 16px rgba(0, 0, 0, 0.1);
}

/* Glow effect */
.glow {
    color: #00ff00;
    box-shadow: 0 0 10px currentColor;
}

/* Inset shadow */
.inset-shadow {
    color: #ff6b6b;
    box-shadow: inset 0 0 10px currentColor;
}

/* Multiple colored shadows */
.multi-shadow {
    color: #0066cc;
}

.multi-shadow:hover {
    color: #ff6b6b;
    box-shadow:
        2px 2px 0 currentColor,
```

```
    4px 4px 0 rgba(0, 0, 0, 0.1);  
}
```

4.2 SVG Styling with `currentColor`

```
<style>  
/* SVG inherits text color */  
.icon-link {  
    color: #0066cc;  
    text-decoration: none;  
}  
  
.icon-link svg {  
    fill: currentColor;  
    stroke: currentColor;  
    width: 1.5em;  
    height: 1.5em;  
    vertical-align: middle;  
}  
  
.icon-link:hover {  
    color: #0052a3;  
}  
  
/* SVG with multiple elements */  
.svg-icon path {  
    fill: currentColor;  
}  
  
.svg-icon circle {  
    stroke: currentColor;  
    stroke-width: 2;  
}  
  
/* Icon button styling */  
.icon-button {  
    display: inline-flex;  
    align-items: center;  
    justify-content: center;  
    width: 2.5rem;  
    height: 2.5rem;  
    color: #666;  
    background: #f0f0f0;  
    border: none;  
    border-radius: 4px;  
    cursor: pointer;  
    transition: all 0.3s ease;  
}  
  
.icon-button svg {  
    fill: currentColor;  
    width: 1.25em;
```

```

        height: 1.25em;
    }

    .icon-button:hover {
        color: #fff;
        background: #0066cc;
    }
</style>

<a href="#" class="icon-link">
    <svg viewBox="0 0 24 24">
        <path d="M12 2L2 7v10c0 5.55 3.84 10.74 9 12 5.16-1.26 9-6.45
            9-12V7l-10-5z"/>
    </svg>
</a>

<button class="icon-button">
    <svg viewBox="0 0 24 24">
        <path d="M12 2C6.48 2 2 6.48 2 12s4.48 10 10 10 10-4.48
            10-10S17.52 2 12 2z"/>
    </svg>
</button>

```

4.3 Outline Styling with currentColor

```

/* Focus state using currentColor */
input:focus {
    outline: 2px solid currentColor;
    outline-offset: 2px;
}

/* Colored outline for different input types */
input[type="email"] {
    color: #0066cc;
}

input[type="email"]:focus {
    outline: 2px solid currentColor; /* Blue outline */
}

input[type="password"] {
    color: #ff6b6b;
}

input[type="password"]:focus {
    outline: 2px solid currentColor; /* Red outline */
}

/* Button focus states */
button:focus {
    outline: 2px solid currentColor;
    outline-offset: 2px;
}

```

```
}

/* Link focus states */
a:focus {
    outline: 2px dashed currentColor;
    outline-offset: 2px;
}
```

4.4 Gradient Borders with currentColor

```
/* Gradient background with currentColor */
.gradient-border {
    color: #0066cc;
    position: relative;
    padding: 1rem;
}

.gradient-border::before {
    content: "";
    position: absolute;
    top: 0;
    left: 0;
    right: 0;
    height: 2px;
    background: linear-gradient(90deg, transparent, currentColor,
        transparent);
}

/* Border with text color */
.colored-border {
    color: #667eea;
    border-bottom: 3px solid currentColor;
    padding-bottom: 1rem;
}

/* Animated border */
.animated-border {
    color: #0066cc;
    position: relative;
    padding-bottom: 0.5rem;
}

.animated-border::after {
    content: "";
    position: absolute;
    bottom: 0;
    left: 0;
    width: 0;
    height: 2px;
    background: currentColor;
    transition: width 0.3s ease;
}
```

```
.animated-border:hover::after {  
  width: 100%;  
}
```

Chapter 5

Design Patterns

5.1 Color-Coded Components

```
<style>
/* Alert box styling */
.alert {
  padding: 1rem;
  border-left: 4px solid currentColor;
  background: rgba(0, 0, 0, 0.02);
}

.alert.error {
  color: #ff0000;
}

.alert.warning {
  color: #ffc107;
}

.alert.success {
  color: #28a745;
}

.alert.info {
  color: #0066cc;
}

/* Icon inside alert */
.alert::before {
  content: " ";
  color: currentColor;
  font-weight: bold;
}

/* Badge styling */
.badge {
  display: inline-block;
  padding: 0.25rem 0.75rem;
  border-radius: 12px;
```

```
        background: currentColor;
        color: white;
        font-weight: bold;
    }

    .badge.primary {
        background: currentColor;
    }
</style>

<div class="alert error">Error message with currentColor styling</div>
<div class="alert warning">Warning message</div>
<div class="alert success">Success message</div>
```

5.2 Status Indicator Styling

```
<style>
/* Status indicator */
.status {
    display: flex;
    align-items: center;
    gap: 0.5rem;
}

.status::before {
    content: "";
    width: 8px;
    height: 8px;
    border-radius: 50%;
    background: currentColor;
    box-shadow: 0 0 5px currentColor;
}

.status.online {
    color: #28a745;
}

.status.offline {
    color: #999;
}

.status.away {
    color: #ffc107;
}

.status.busy {
    color: #ff0000;
}

/* List with colored bullets */
.colored-list {
    list-style: none;
}
```

```
        padding-left: 0;
    }

    .colored-list li {
        color: #0066cc;
        margin-bottom: 0.5rem;
    }

    .colored-list li::before {
        content: " ";
        color: currentColor;
        margin-right: 0.5rem;
    }
</style>

<div class="status online">Online</div>
<div class="status offline">Offline</div>
<div class="status away">Away</div>
```

5.3 Icon Library with currentColor

```
<style>
    /* Icon styling */
    .icon {
        display: inline-flex;
        align-items: center;
        justify-content: center;
        width: 1em;
        height: 1em;
        font-size: 1.5rem;
    }

    .icon svg {
        fill: currentColor;
        stroke: currentColor;
    }

    /* Icon sizes */
    .icon.small {
        font-size: 1rem;
    }

    .icon.large {
        font-size: 2rem;
    }

    .icon.extra-large {
        font-size: 3rem;
    }

    /* Icon colors */
    .text-primary {
```

```

        color: #0066cc;
    }

    .text-success {
        color: #28a745;
    }

    .text-danger {
        color: #ff0000;
    }

    .text-warning {
        color: #ffc107;
    }

    /* Icon in buttons */
    .btn-icon {
        display: inline-flex;
        align-items: center;
        gap: 0.5rem;
        padding: 0.5rem 1rem;
        border: none;
        background: transparent;
        cursor: pointer;
        color: #0066cc;
    }

    .btn-icon svg {
        fill: currentColor;
    }
</style>

<span class="icon text-primary">
    <svg viewBox="0 0 24 24"><circle cx="12" cy="12" r="10"/></svg>
</span>

<button class="btn-icon">
    <svg viewBox="0 0 24 24" width="20" height="20">
        <path d="M12 2C6.48 2 2 6.48 2 12s4.48 10 10 10 10-4.48
            10-10S17.52 2 12 2z"/>
    </svg>
    Button
</button>

```

Chapter 6

Form Styling with currentColor

6.1 Input Fields with currentColor

```
<style>
/* Form group with currentColor */
.form-group {
  margin-bottom: 1.5rem;
}

.form-group label {
  display: block;
  margin-bottom: 0.5rem;
  color: #333;
  font-weight: 600;
}

.form-group input {
  width: 100%;
  padding: 0.75rem;
  border: 2px solid #ddd;
  border-radius: 4px;
  font-size: 1rem;
}

/* Input with colored focus */
.form-group input:focus {
  outline: none;
  border-color: currentColor;
  box-shadow: 0 0 0 3px rgba(0, 102, 204, 0.1);
  color: #0066cc;
}

/* Colored input variants */
.input-primary:focus {
  border-color: #0066cc;
}

.input-success:focus {
  border-color: #28a745;
```

```
}

.input-danger:focus {
  border-color: #ff0000;
}

/* Input with icon indicator */
.input-with-icon {
  position: relative;
}

.input-with-icon::after {
  content: " ";
  position: absolute;
  right: 1rem;
  top: 0.75rem;
  color: currentColor;
  font-weight: bold;
  display: none;
}

.input-with-icon.valid::after {
  display: block;
  color: #28a745;
}
</style>

<form>
  <div class="form-group">
    <label>Email</label>
    <input type="email" class="input-primary">
  </div>
</form>
```

6.2 Form Validation Messages

```
<style>
/* Error message styling */
.error-message {
  color: #ff0000;
  font-size: 0.875rem;
  margin-top: 0.5rem;
  display: none;
}

.error-message::before {
  content: " ";
  color: currentColor;
  font-weight: bold;
}

.form-group.error .error-message {
```

```
        display: block;
    }

    .form-group.error input {
        border-color: currentColor;
    }

    /* Success message */
    .success-message {
        color: #28a745;
        font-size: 0.875rem;
        margin-top: 0.5rem;
        display: none;
    }

    .success-message::before {
        content: " ";
        color: currentColor;
        font-weight: bold;
    }

    .form-group.success .success-message {
        display: block;
    }
</style>

<div class="form-group error">
    <label>Username</label>
    <input type="text" value="">
    <span class="error-message">Username is required</span>
</div>
```

Chapter 7

Best Practices

7.1 When to Use `currentColor`

1. **Related properties:** When multiple properties should match text color
2. **Color variants:** Creating multiple color themes with same structure
3. **Icon styling:** Icons within colored text elements
4. **Focus states:** Accessible focus indicators
5. **Decorative elements:** Borders, shadows matching text
6. **Component libraries:** Reusable components with theme support

7.2 Performance Benefits

- **Reduced CSS:** One color value affects multiple properties
- **Faster rendering:** Fewer color recalculations
- **Easier maintenance:** Single color change propagates everywhere
- **Smaller file size:** Less repetition in CSS code
- **Better cascade:** Leverages CSS inheritance naturally

7.3 Accessibility Considerations

```
/* Ensure sufficient contrast */
a {
  color: #0066cc; /* WCAG AA compliant */
  text-decoration: underline;
  text-decoration-color: currentColor;
}

/* Focus states with currentColor */
a:focus {
  outline: 2px solid currentColor;
```

```
    outline-offset: 2px;
}

/* High contrast mode support */
@media (prefers-contrast: more) {
    a {
        text-decoration-thickness: 2px;
    }
}

/* Reduced motion support */
@media (prefers-reduced-motion: reduce) {
    .animated-element {
        transition: none;
    }
}
```

7.4 Testing `currentColor` Across Browsers

```
/* Fallback for older browsers */
.element {
    border-color: #0066cc;          /* Fallback */
    border-color: currentColor; /* Modern browsers */
}

/* Feature detection */
@supports (color: currentColor) {
    .element {
        border-color: currentColor;
        box-shadow: 0 2px 4px currentColor;
    }
}
```

Chapter 8

Complete Examples

8.1 Navigation Menu with currentColor

```
<style>
  .nav {
    display: flex;
    gap: 2rem;
    padding: 1rem;
    background: #f8f9fa;
  }

  .nav a {
    color: #333;
    text-decoration: none;
    padding-bottom: 0.5rem;
    border-bottom: 2px solid transparent;
    transition: all 0.3s ease;
  }

  .nav a:hover {
    color: #0066cc;
    border-bottom-color: currentColor;
  }

  .nav a.active {
    color: #0066cc;
    border-bottom-color: currentColor;
    font-weight: bold;
  }

  .nav svg {
    fill: currentColor;
    width: 1.25em;
    vertical-align: middle;
    margin-right: 0.5rem;
  }
</style>

8.2 Card Component

```
<style>
.card {
  padding: 1.5rem;
  border: 1px solid #ddd;
  border-radius: 8px;
  background: white;
}

.card-icon {
  font-size: 2rem;
  margin-bottom: 1rem;
}

.card-title {
  color: #333;
  font-size: 1.25rem;
  margin-bottom: 0.5rem;
}

.card-description {
  color: #666;
  line-height: 1.6;
  margin-bottom: 1rem;
}

.card-action {
  display: inline-block;
  color: #0066cc;
  text-decoration: none;
  border-bottom: 2px solid currentColor;
  transition: all 0.3s ease;
}

.card-action:hover {
  color: #0052a3;
  border-bottom-color: currentColor;
}

/* Colored card variants */
.card.primary {
  border-left: 4px solid #0066cc;
}

.card.primary .card-title {
```

```
        color: #0066cc;
    }

    .card.success {
        border-left: 4px solid #28a745;
    }

    .card.success .card-title {
        color: #28a745;
    }

    .card.danger {
        border-left: 4px solid #ff0000;
    }

    .card.danger .card-title {
        color: #ff0000;
    }
</style>

<div class="card primary">
    <div class="card-icon"> </div>
    <h3 class="card-title">Design</h3>
    <p class="card-description">Beautiful visual designs</p>
    <a href="#" class="card-action">Learn more →</a>
</div>
```

8.3 Status Badge System

```
<style>
    .badge {
        display: inline-block;
        padding: 0.25rem 0.75rem;
        border-radius: 12px;
        font-size: 0.875rem;
        font-weight: 600;
        background: rgba(0, 0, 0, 0.05);
        border: 1px solid currentColor;
        color: currentColor;
    }

    .badge.success {
        color: #28a745;
    }

    .badge.danger {
        color: #ff0000;
    }

    .badge.warning {
        color: #ffc107;
    }
</style>
```

```
.badge.info {
  color: #0066cc;
}

/* Filled variant */
.badge.filled {
  background: currentColor;
  border-color: currentColor;
  color: white;
}

/* Large variant */
.badge.large {
  padding: 0.5rem 1rem;
  font-size: 1rem;
}

/* Badge with icon */
.badge-icon {
  display: inline-flex;
  align-items: center;
  gap: 0.5rem;
}

.badge-icon::before {
  content: " ";
  color: currentColor;
}
</style>

<span class="badge success">Active</span>
<span class="badge danger">Inactive</span>
<span class="badge warning">Pending</span>
<span class="badge info">New</span>
```

Chapter 9

Quick Reference

9.1 `currentColor` Use Cases

```
/* Border styling */
.element { border: 1px solid currentColor; }

/* Box shadow */
.element { box-shadow: 0 2px 4px currentColor; }

/* Text decoration */
.element { text-decoration-color: currentColor; }

/* SVG fill/stroke */
svg { fill: currentColor; stroke: currentColor; }

/* Outline */
.element { outline-color: currentColor; }

/* Background */
.element { background-color: currentColor; }

/* Caret color */
input { caret-color: currentColor; }

/* Accent color */
input[type="checkbox"] { accent-color: currentColor; }
```

9.2 Common Patterns

```
/* Icon and text matching */
a { color: #0066cc; }
a svg { fill: currentColor; }

/* Colored borders matching text */
.heading {
  color: #333;
  border-bottom: 2px solid currentColor;
}
```

```
}

/* Focus indicators */
button:focus {
    outline: 2px solid currentColor;
    outline-offset: 2px;
}

/* Color variants */
.text-primary { color: #0066cc; }
.text-success { color: #28a745; }
.element { border: 1px solid currentColor; }
```

9.3 Setup Template

```
/* Production-ready currentColor setup */

/* Links */
a {
    color: #0066cc;
    text-decoration: underline;
    text-decoration-color: currentColor;
}

a:hover {
    color: #0052a3;
}

/* Icons */
.icon {
    color: inherit;
}

.icon svg {
    fill: currentColor;
    stroke: currentColor;
}

/* Buttons */
button {
    border: 2px solid currentColor;
    color: inherit;
}

button:hover {
    background: currentColor;
    color: white;
}

/* Focus states */
a:focus, button:focus {
    outline: 2px solid currentColor;
}
```

```
    outline-offset: 2px;
}

/* Color variants */
.primary { color: #0066cc; }
.success { color: #28a745; }
.danger { color: #ff0000; }
```
